A journal of applied topics in business and economics

Copyrighted 1996 - 2017 by the
Richards College of Business, University of West Georgia
Carrollton, Georgia U.S.A.

ISSN 1084-3981

When books were handwritten, it took a very long time for one to be completed, and they were so expensive that few could afford them. Then came the printing press. Today the World Wide Web is revolutionizing publishing in the same way the invention of the printing press did.

The Richards College of Business, the University of West Georgia began publishing *B>Quest (Business Quest)* in 1996. Its primary objective is to serve as an interface between and within different disciplines in schools of business. It makes available, at no charge, throughout the world highly readable articles in the various schools of

PERFORMANCE ENHANCEMENT OF CUDA APPLICATIONS BY OVERLAPPING DATA TRANSFER AND KERNEL EXECUTION
K. RAJU, Niranjan N CHIPLUNKAR
ABSTRACT Click to collapse
The CPU-GPU combination is a widely used heterogeneous computing system in which the CPU and GPU have different address spaces. Since the GPU cannot directly access the CPU memory, prior to invoking the GPU function the input data must be available on the GPU memory. On completion of GPU function, the results of computation are transferred to CPU memory. The CPU-GPU data transfer happens through PCI-Express bus. The PCI-E bandwidth is much lesser than that of GPU memory. The speed at which the data is transferred is limited by the PCI-E bandwidth. Hence, the PCI-E acts as a performance bottleneck. In this paper two approaches are discussed to minimize the overhead of data transfer, namely, performing the data transfer while the GPU function is being executed and reducing the amount of data to be transferred to GPU. The effectiveness of these approaches on the execution time of a set of CUDA applications is realized using CUDA streams. The results of our experiments show that the execution time of applications can be minimized with the proposed approaches.

Biosensors
Biosensors is an international, peer-reviewed, open access journal on the technology and science of biosensors published monthly online by MDPI.
Open Access — free for readers, with article processing charges (APC) paid by authors or their institutions.
